

New display cases in three buildings on campus
Swan, Jeremy (NIH/NICHHD) [C] posted on Mar 18, 2020

New display cases have been installed around campus. Read a comic book about [Joseph Goldberger's work in pellagra](#) in the early 20th century at the Building 1, 3rd floor case. Be amazed at the variety of Clinical Center patches near the Hospitality Desk on the 1st floor of the Clinical Center. Think about the social context of coloring books from the Clinical Center by its 2nd floor cafeteria. And salute a leading woman investigator, [Dr. Margaret Pittman](#), in the Building 60 lobby. Two cases are coming to the Vaccine Research Center, and one to Building 6.

Hand Hygiene in Hospitals

Swan, Jeremy (NIH/NICHD) [C] posted on May 20, 2020

CC News, July 2013, Michelle Holshue

"One of the most remarkable developments of the last 50 years is the awakening of a sanitary conscience. It is a new thought to many men that the care of the body and cleanliness of surroundings are very considerable factors in the comfort, safety, and even the life and health of their fellow men."

- —Surgeon General Hugh Cumming, 1928.

February is American Heart Month, and February 22nd is Heart Valve Disease Awareness Day.

Swan, Jeremy (NIH/NICHD) [C] posted on Feb 01, 2020

About 11 million Americans have heart valve disease, and millions of them need to have their valves replaced. The first successful replacement of a mitral heart valve was done at the NIH Clinical Center by Dr. Nina Braunwald in 1960, using a valve she had designed. This photo shows Braunwald, far left, and Dr. Andrew Morrow, far right, both from NHLBI, performing heart valve surgery in the early 1960s. February is American Heart Month, and February 22nd is Heart Valve Disease Awareness Day.

Behind the Mask

COVID-19 has impacted the NIH community in many ways—from researching and providing information about the disease, to developing therapeutics and vaccines, to caring for patients in the Clinical Center, to re-configuring the ways we perform our jobs. To preserve this important time in NIH history, the Office of NIH History and Stetten Museum is seeking reflections, documents, photographs, and objects about how those at NIH have experienced the COVID-19 pandemic.
